

PRESS RELEASE: JANUARY 15th, 2008

**Gram Technology opens east coast location to strengthen its USA operations and provide further support for the global marketplace.**

Gram Technology is an established “One-Shop-Provider” for advanced mold technology with locations in Arizona, Denmark and now in Florida.

Gram Technology provides a fully integrated turnkey service to its customers - from design, to product development and final production - by cooperating and negotiating with the frontrunners of the advanced and multi component mold industry.

Gram Technology is the inventor and developer of Spin-Stack®; a unique mold technology that reduces overall manufacturing costs, affords faster cycle times and provides opportunities for adding product value - such as in-mold painting and in-mold assembly.

Gram Technology is constantly investigating ways to streamline its operations to provide lower prices, to promote technical consultation, to make available turnkey solutions, and to progress mold technology licensing.

*As part of its Global Sales & Marketing strategy Gram Technology is pleased to announce that Ron Cisliek has joined the Company as Director of Sales & Marketing to coordinate and progress its expanding client base and product catalogue.*

“With his sales and marketing experience, product development and tooling knowledge Ron brings an ideal balance to our organization.” says Jes Gram, President of Gram Technology. “This is the perfect time for us to expand and strengthen our team: We have seen continued advancement with our Gram Technology solutions and customer base, steady growth in our tooling partners, and continued validation of our patents worldwide. In the past few years the demand and opportunity for Gram Technology has been greater than we expected. We look forward an exciting 2008 and beyond.”
